**FRONT RIGHT CHANNEL**

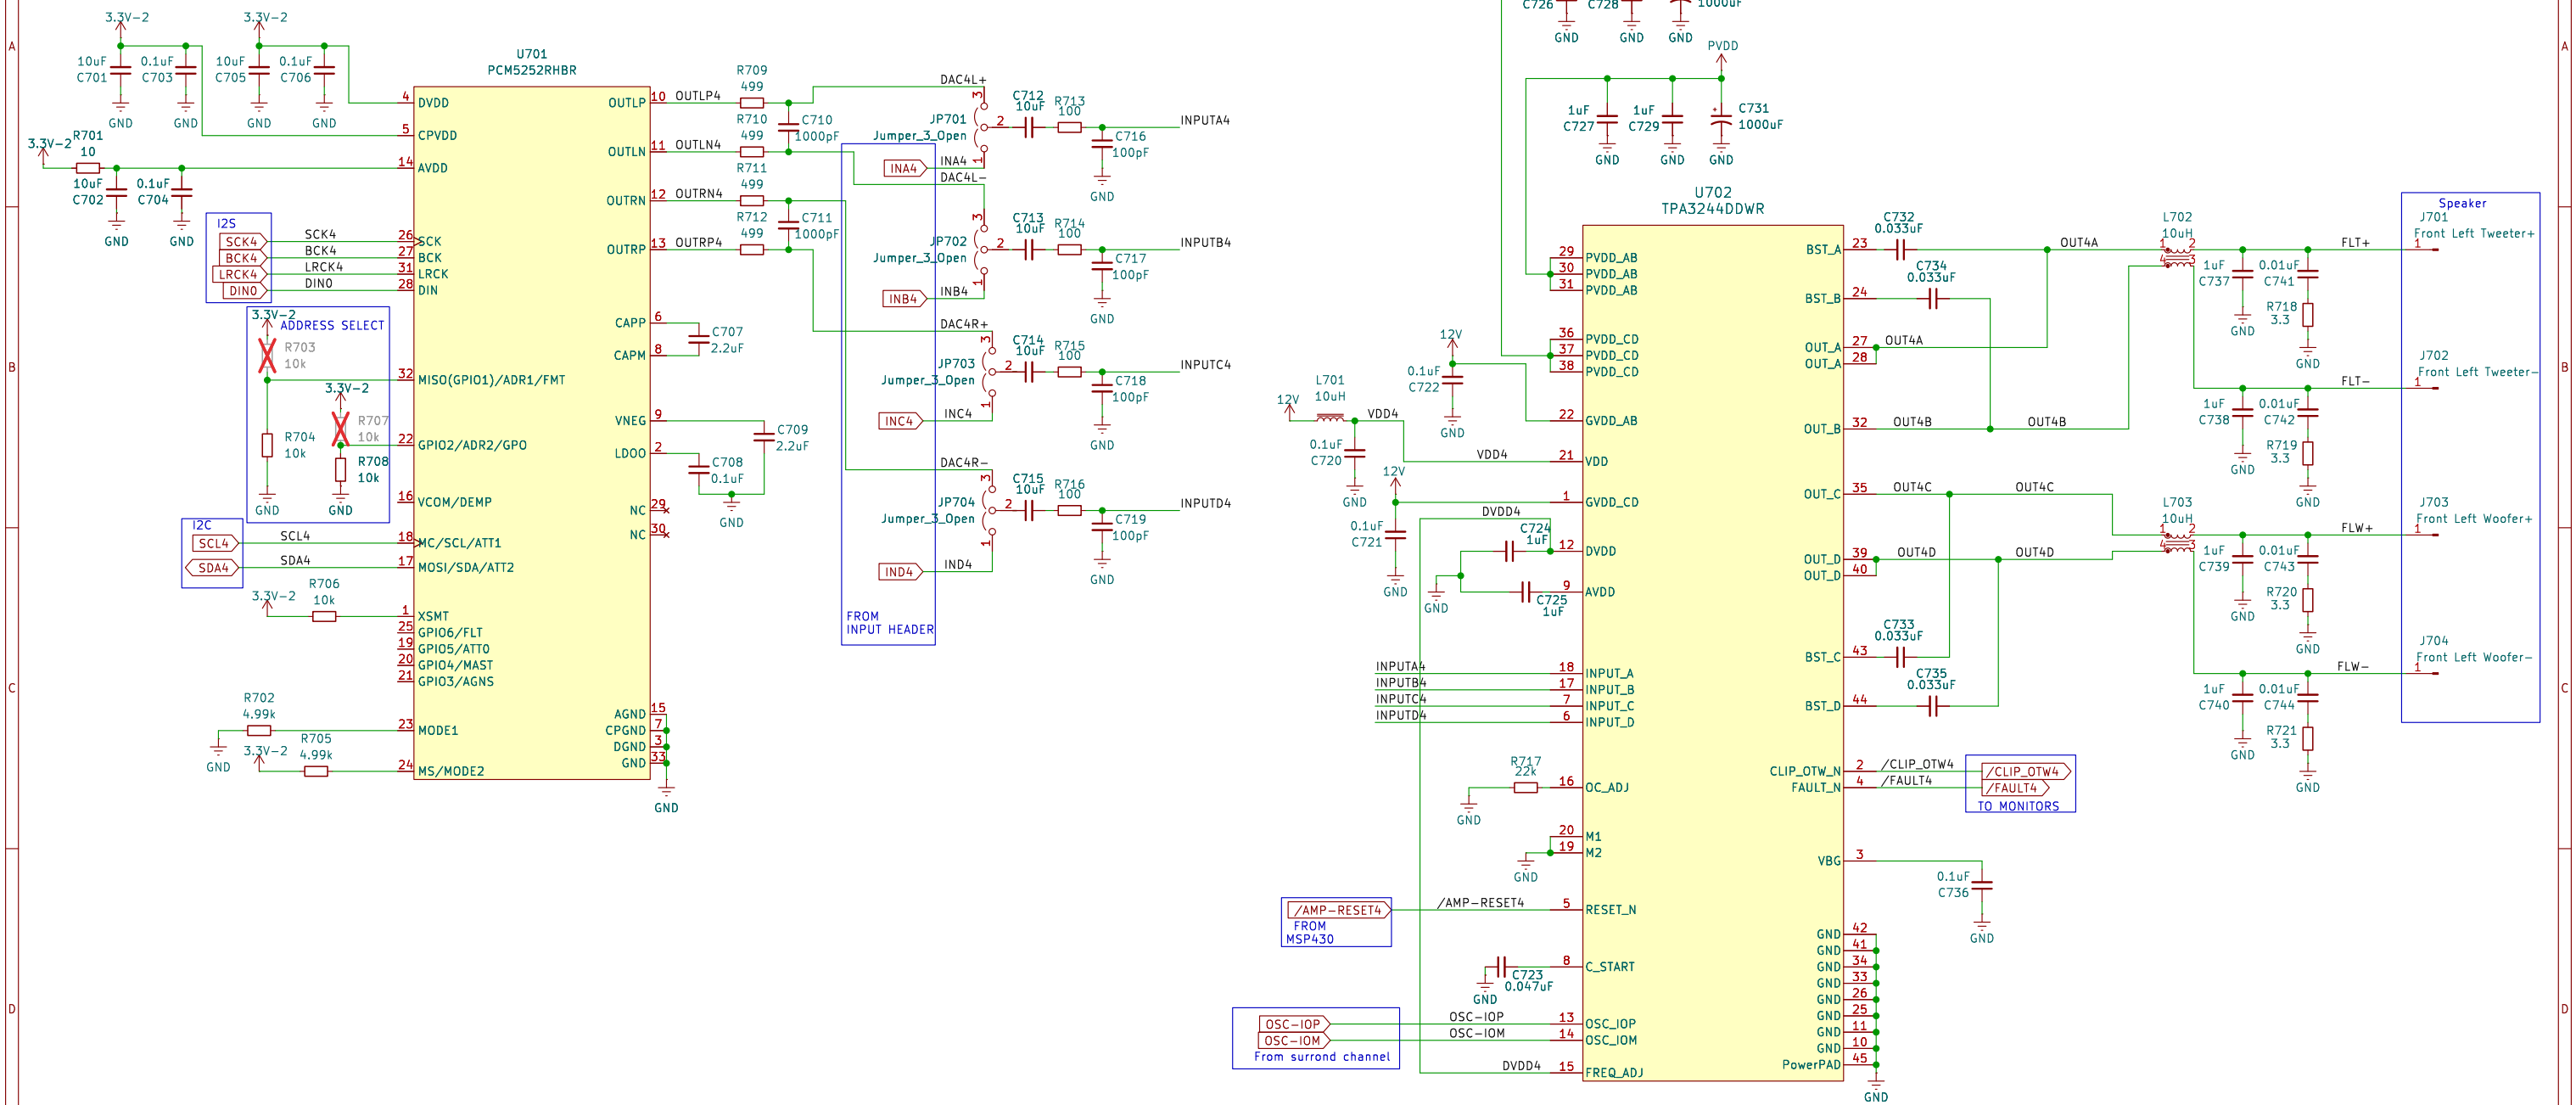

The schematic illustrates the Front Right Channel of an audio amplifier. It features a PCM5252RHBR DAC (U601) and a TPA3244DDWR amplifier (U602). The DAC is configured with an I2S interface and an address select switch. The amplifier is powered by a 12V supply and drives four speakers: Front Right Tweeter+, Front Right Tweeter-, Front Right Woofer+, and Front Right Woofer-. The circuit includes various passive components for signal conditioning and power supply decoupling, as well as jumpers for configuration. A clip/OTW3 indicator is provided for monitoring.
